Teacher

Sir MUKHTAIR ZAMIN

Chapter #1

Proposal:

Our Group have decided to make a E-commerce. In which a user can buy and sell item from the Application. In this user can make a account and then upload the picture of the item and the other user can select the item from the dashboard of the application

Tools:

Kotlin

Firebase

Androidstudio

Chapter #2

Problem:

To build a ecommerce App From which a user can buy and sell things

Abstract:

In this Project we will build a ecommerce App. From this app User will be able to sell its products online. This app basically consist on two panel (Admin panel and Customer panel).If a user wants to see his things he will make a account as Admin and if the Person wants to Sell the Items then he would make the account as the User.

Group Discussion

We did our group meeting via MS Teams

Solution:

So we divided this project in 3 Modules

First Module:

Firebase Authentication , Storing Data and Uploading Files To the Firebase Storage

Second Module:

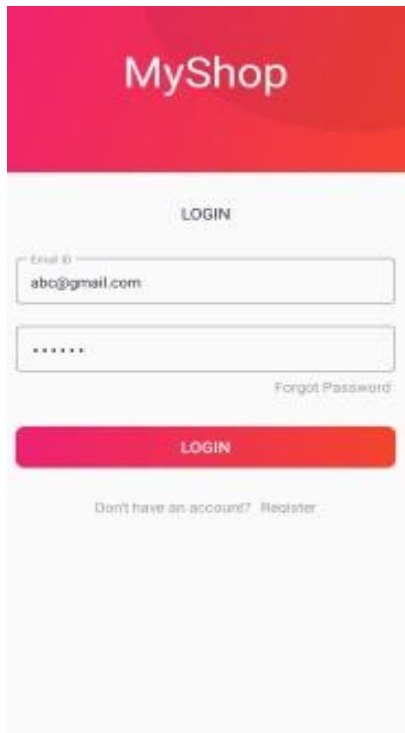

Developing the Adding and Displaying of Products, Developing Product Details Screen And Developing Cart ,Cart Overview and Details

Third Module

Adding The Checkout Activity ,Allowing The User To Add Addresses And Building the Order Screen

First Module:	Second Module	Third Module
Faheem	Moiz	Faheem, Hassaan
Kashif	Talha	Muizz,Talha
Hassaan	Zubair	Kashif,Zubair

User Interface:

The image shows a mobile app login screen for 'MyShop'. At the top is a red header with the 'MyShop' logo in white. Below the header is a light gray background. The word 'LOGIN' is centered in a small, dark font. There are two input fields: the first is for 'Email ID' with the placeholder text 'abc@gmail.com', and the second is for a password, represented by six dots. To the right of the password field is a link that says 'Forgot Password?'. Below the input fields is a large, rounded rectangular button with a red-to-orange gradient and the word 'LOGIN' in white. At the bottom, there is a link that says 'Don't have an account? Register'.
